

IP Office 4400, 4600 & 6400 Series Changing System Time & Date

One phone with a Menu key can be allocated as a "System Phone" by the System Administrator. The user of that phone can then change the date and time displayed on all phones.

Note: There will be a short delay before some telephones will update their displayed date and time.

To change the date/time:

1. Press **Menu**
2. Select **Func.**
3. Press and select **Setup.**
4. Select either **Date** or **Time.**
5. Enter the new value. Use the * key to enter a : in times. Use the # key to enter a / in dates.
6. After entering the new date or time, select **Done.**
7. Press **Exit .**
